OUR TEAM

The ABBA team features behavioral treatment clinicians, including board-certified behavior analysts, licensed professional counselors, clinical social workers, master’s-level special education teachers and ESDM certified practitioners. Many ABBA clinicians have 20 years or more experience working within the field of autism. As members of Agnesian HealthCare, the team collaborates with speech and occupational therapists, as well as mental health specialists. Our behavioral treatment technicians receive extensive training in ABA, ESDM, behavioral supports, play-based interventions and natural environment teaching.

Darold Treffert, MD, world-renowned expert on savants and hyperlexia, partners with ABBA as a mentor and consultant. Matt Doll, PhD, child psychologist, provides clinical services that focus on the particular needs of families and children, especially children with ASD, ADHD and those who have been traumatized.

We are proud to offer the Treffert Approach in our care.

Welcome to Agnesian Beyond Boundaries of Autism (ABBA)

ABBA was originally founded in 2004 and moved to Agnesian HealthCare in 2014. ABBA partners with families, schools, day cares and other entities to provide high quality, relationship-based treatment plans for children ages six and under.

Services are offered wherever the child is at including home, the classroom and the community. Plans build on the strengths of every child and utilizes Applied Behavioral Analysis (ABA) and the Early Start Denver Model (ESDM), both evidence-based practices, to provide relationship-based treatment for children.

- In-home services are currently available in Oshkosh, Appleton, Green Bay and the surrounding areas.

* For these locations, contact Angela Fellenz at (920) 979-7593 or e-mail Angela.Fellenz@ssmhealth.com.

* For all other locations, contact the Treffert Center at (920) 907-3928.

Services

Behavioral Treatment Services

- Comprehensive Treatment: This intensive, one-on-one treatment model includes providing up to 40 hours of play-based intensive behavioral intervention focused on building foundational skills in a variety of areas.
  - ESDM - utilizes a specific developmental curriculum that combines behavioral, relationship-based, and play-based approaches into one cohesive treatment for our youngest learners.
  - ABA - behavioral treatment option for families who are seeking a relationship and play-based approach that systematically applies interventions based upon the principles of behavior, learning and motivation to teach socially significant skills.

Additional Services Available

- Daily Living Skills
- School Consultation
- Functional Behavior Assessment
- Educational Workshops
- Community Trainings

The best outcomes occur when we invest in relationships with clients, staff and community partners to achieve shared goals. It is understood that for all of us, including individuals on the autism spectrum, development is a lifelong process. ABBA aims to effectively partner with, engage, teach and support the families who entrust us with their children.

Questions

What if I need a diagnosis?
You can contact Agnesian HealthCare Doll & Associates at (920) 907-8201 for a strength-based diagnosis.

Do I have to travel to Fond du Lac for treatment?
No. We come to you. Treatment teams are located in Oshkosh, Appleton, Green Bay and surrounding areas ready to help. In home, in day cares and in the community, we work collaboratively with all entities.

How do I pay for treatment?
ABBA is contracted more than 30 insurance companies to provide mandated autism services. We are also a Medicaid provider to offer comprehensive autism treatment to children ages six and under.
